

THE NEXT-GENERATION
2025 FORD
EVEREST®

ALL-NEW AND READY FOR ACTION.

The all-new Next-Gen 2025 Ford Everest SUV more than earns its impressive name. It's built tough and can take you and your crew of adventure seekers far from the beaten path. With a newly designed exterior firmly planted at its corners, and new soft touch finishes inside the sophisticated interior, it's time to aim higher with the Everest SUV.

**4x4
With Locking
Diffrential**

**6 Off-Road
SELECTABLE
DRIVE MODES**

**Full Assisted
Parking Aid**

5 Years manufacturer Warranty up to 100,000km

Why Ford PremiumCARE warranty is Great Value?

The price for parts and labor to repair many major components can be significant. One repair bill can easily exceed the price of your Ford Premium Care Warranty coverage. It's clear that this coverage can quickly pay for itself!

An Incredibly Smart SUV

POWER

UP AND GO.

With 296-hp, the 2.3L Turbo 4 Cylinder engine comes equipped with a 10-speed automatic transmission and is standard on all Everest models.

2.3L TURBO 4 Cylinder

10-SPEED TRANSMISSION

296 HP

420 Nm

EXCEPTIONAL CAPABILITY.

You just know with a name like the Ford Everest SUV that you're fully capable of going places lesser vehicles wouldn't dare. Even better, it's built tough. That means it can take on all types of terrain. The available Terrain Management System™ with 6 Selectable Drive Modes lets you amp up the driving experience you want, or that road conditions demand. And Electronic Stability Control (ESC) and Roll Stability Control™ help you keep the Everest SUV firmly planted on the ground.

NORMAL

Intended for everyday use and can be used on- and off-road in general driving conditions.

ECO

Maximises fuel economy by reducing throttle sensitivity, upshifting gears earlier and adding a more economical cruise control tune.

TOW/HAUL

Designed to be used when towing or carrying a heavy load and optimises gear shift timing to maintain power delivery and engine braking in hilly terrain

SLIPPERY

For use on firm but slippery surfaces (snow and ice). The engine and transmission are optimised (early gear shifting) to reduce wheel spin with traction control optimised

MUD/RUST

For use only off-road in soft, muddy, rutted, or waterlogged tracks, this mode is designed to help maintain vehicle momentum but still allow for some wheel slip to assist in clearing mud from the tyre tread.

SAND

Another off-road only mode designed to be used on both sand and deep snow and optimises gear shifts with lower gears held longer to help maintain momentum
